- Hazard
- Symptoms
- Illness
- Emergency

How to meet the needs of an ill child

Physical needs

Emotional needs

Social needs

Intellectual needs

When to seek emergency medical help

- Breathing difficulties
- Unresponsive
- Limp
- High fever
- Seizures/fitting

Creating a safe environment for children to grow and thrive is important between the ages 0-4. Some of the places within a home which have common hazards are: **Kitchen, Toilets/Bathroom, Stairs, Play Areas**

A typical exam style question you maybe asked on this topic would be

– what is a hazard and what common hazards can be found in the home?
